# Austin Taylor

**Software Developer**

**GitHub** | **Portfolio** | **LinkedIn** | **Medium**
**2292219699** | **austinrtaylor91@gmail.com**

A Cameraman turned Software Engineer. I'm a tinkerer who has always been fascinated by the inner workings of gadgets. From converting my vintage bikes to fixies to developing my own film photography, I disassemble and rebuild anything I can get my hands on just to understand how it works. After a successful tenure in the film industry, I am further cultivating my curiosity and creative spirit by crafting code and connecting communities.

## RECENT PROJECTS:

- **Butter Behavior**: Private Repos - React, Redux, Firebase, TailwindCSS, Node
- **Hoverstate University**: Frontend | Backend - React, Redux, TailwindCSS, PostgreSQL, Sequelize, Express, Node, Railway, Netlify
- **brtr**: Frontend Repo | Backend Repo - React, PostgreSQL, Sequelize, Express, Node, Railway, Vercel
- **Rated Our**: Frontend Repo | Backend Repo - React, PostgreSQL, Sequelize, Express, Node, Railway, Vercel
- **Crapple Maps**: Repo - React, MongoDB, Mongoose, Express, Node
- **Block Invaders**: Repo - JavaScript, HTML, CSS

## SKILLS

- **Languages:** JavaScript, HTML, CSS, Python
- **Frameworks and Libraries:** React.js, Vue.js, Express.js, Mongoose, Sequelize, Django, Flask
- **Databases:** MongoDB, PostgreSQL
- **Tools:** Git, GitHub, RESTful APIs, MERN stack, PERN stack, Google Firebase, TailwindCSS

## RELEVANT EXPERIENCE

**Software Engineering Immersive Instructional Associate**

*General Assembly | 09/2022 – 12/2022*

Collaborated with co-instructors to guide cohorts of 25 students through a 12-week, rigorous, Full-Stack Software Engineering Immersive course covering full-stack application architecture and implementation.

- **Technologies Taught:** CLIs, Git, JavaScript, React, Redux, Vue, Express, Mongoose, Sequelize, MongoDB, PostgreSQL, Node, Python, Django, and Flask.
- **Paradigms Taught**: Object Oriented Programming, Functional Programming, Mobile First Responsive Web Design, RESTful API Design using MVC Server Side Architecture.
- Provide daily code review and constructive feedback to 25 students.
- Debug students' code by pair programming and providing support in a StackOverflow style Slack channel

**Software Engineering Immersive Fellow**

*General Assembly | 06/2022 – 09/2022*

Completed 500+ hours of coursework in JavaScript, React, Python, MongoDB, Mongoose, PostgreSQL, Sequelize, Django, Express, and architecting and implementing multiple solo and group full-stack applications.

**Camera Technician**

*IATSE Local 600 | 05/2015 – 06/2022*

- Led teams of 9-12 in a fast-paced, deadline-driven environment to execute tasks on time and on budget.
- Anticipated and proactively provided solutions for the Camera Department's daily changing gear needs.
- Trained and onboarded over two dozen team members who had zero prior industry-specific experience.

## EDUCATION

**General Assembly** | **Software Engineering Immersive** | Remote
**B.A. Entertainment and Media Studies** | **University of Georgia** | Athens, GA
